

Submitter: Debra Willson

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I support a moratorium on Factory Farms in Oregon!

Factory farms pollute the air and water.

The neighbors of these farms suffer the most. Of they can't even open their windows due to the ammonia stench.

But we all suffer when air and water are polluted!

The ones who suffer the most are the animals.

They never see the light of day, never feel sunshine on their bodies.

Most never feel the earth under their feet.

They are often caged and unable to fully move.

The animals are treated like commodities, like units of production.

They suffer from birth until death.

Why would anyone allow such incredible cruelty to happen in Oregon?

Not me!

These are SENTIENT BEINGS!

They experience pain, fear, terror, and suffering just as you do.

We need to treat animals with more compassion.

It's time for people to wake up!

Most chronic illnesses today are caused by an EXCESS of animal protein in our bodies.

Our distant ancestors did not eat the quantity of "animal products" that we do today.
