

Submitter: DEBRA SIEG

On Behalf Of:

Committee: House Committee On Rules

Measure: HB3509

****Vote NO on HB3509**** Rank-choice voting is an instant runoff system that neutralizes the people's will. The ballots continue to be counted until one candidate has the majority of votes. There are too many choices which distorts the method and may not reflect voters' choice. There is total reliance on computer programming which is another venue for voter fraud which is where we are right now !!!!. Also there is no way for auditing the results which is another way to continue with our present voter fraud !!!!! .
