

Submitter: Bridgette Rappoport

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB3152

My understanding of this proposed piece of legislature is it will prevent new construction from having natural gas an option for heating or cooking.

I am totally opposed to this as it has remained for decades a safe and inexpensive means to heat homes and to cook.

I don't see any clear cut evidence how this increases greenhouse gas emissions in any significant way.
