

Submitter: Kara McGarry
On Behalf Of:
Committee: Joint Committee On Transportation
Measure: HB3382

Greetings Representatives,

Making dramatic changes to deep channel ports could cause irreversible damage to delicate estuary ecosystems. This is not only a danger to wildlife and natural areas, but could greatly effect the small towns and businesses that depend on them. These areas depend on the health of these ecosystems for ocean products, food and tourism. These areas support many more traditional and long term jobs than outside companies could create with short term work. Please do not sacrifice our coastal ways of living for outside companies to make money and leave us with a decimated resource. Please do not support HB3382.

Thank you,
Kara McGarry
