

Submitter: Shannon Botten

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB3152

The idea that we would yet again place another barrier for a business to open in our state is appalling. Bills like this one is pushing people away to other states not bringing them in. With proper, up to code ventilation, there is no reason natural gas can not be used to cook. This is another silly distraction from the real problems our state is facing. If the argument is for a Greener planet our contribution to the problem is so minuscule it is silly to even consider. Pushed by a different agenda clearly. The cost of this bill on the tax payers far outweighs the Benefits it is even perceived to give. Please vote no on this bill.
