

Submitter: Amanda Zander

On Behalf Of: Malheur County Weed Dept

Committee: Joint Committee On Ways and Means Subcommittee On Natural Resources

Measure: HB5002

Without the grants, manpower and knowledge provided by ODA Malheur County would not be able to conduct upwards of 80% of the weed work being carried out every year. As an agricultural county this work is incredibly important to maximize crop/livestock production and quality. Weed work is also done in several recreational sites to help provide a more pleasant experience for those who enjoy outdoor activities. The war against weeds may never be won, but we stand a better chance with more support behind the effort.
