

Submitter: Lana Lindstrom
On Behalf Of:
Committee: Joint Committee On Transportation
Measure: HB3382

I am grateful that OR has strict land use laws. It's why I moved here. This bill would effectively gut those laws for our larger ports. Estuaries are critical ecosystems on which animals and birds rely on for food, places to breed and migration stopovers. They also bring in revenue to the surrounding communities through tourism - boating, hiking, exploring and staying in motels and eating in local restaurants. Let's not further destroy them in order to allow some businesses to profit. Complying with state laws is critical for the livability of our earth. Thank you for opposing this bill.
