

Submitter: Eric Hill

On Behalf Of:

Committee: House Committee On Rules

Measure: HB2004

To whom it may concern:

I am opposed to HB 2004 with a ranked choice voting system. Our family is opposed to this method, because there are already enough problems with our voting system, and this compound the problems in our humble opinion. It is hard enough to figure out who the best 1 candidate is, let alone trying to rank them. Too many choices can distort the results. Furthermore, there is complete reliance on correct computer programming, and no way to audit the results. Furthermore, it has been shown to reduce voting numbers as voters are less informed regarding lesser desired candidates, in which case placing them 2nd or 4th may create skewed results.

Thank you for your consideration.

Eric Hill
