

Submitter: Payton Jasmer

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2665

This bill should be opposed to because it will be detrimental to the healthcare workers and patients in Oregon. Oregon benefits from having competitive wages as it brings staff from all areas and provides incentive to work in a highly stressful and demanding career field. Without this financial incentive many people are and will be leaving the career field. Oregon must not put caps on potential wages.
