

Submitter: Helen Gill

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB3152

This bill takes away the consumer's right to choose! We are "at the end of the line" on our power grid which means if there is a power fluctuation or issue, our house is out of power. About 6-7 years ago we were out of power during a winter snow storm for 4 1/2 days until it was fixed. We were all-electric. We had no way to get water (we are on a well), cook or heat the house. Because of that we eventually installed a gas fireplace and stove. With cars now having to go electric, I am fearful of the grid being overloaded and the far reaching ramifications that would entail. Oregonians want to have options and the ability to make our own decisions over our lives and homes. Thank you.
