

Submitter: Kelsey Barnett

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2555

Naturopathic physicians trained and functioning often as primary care providers for many Oregon residents deserve fair reimbursement to their medical professional equivalents. They go above and beyond and truly focus on health promotion and prevention of disease and thus theoretically in the long run reduce overall medical costs throughout an individuals lifespan. I utilize naturopathic doctors as my primary care and have never questioned their medical ethics or competency. I am in favor of this bill, please continue to allow access to this type of care by insuring my private insurance to be required to pay my doctor what they are worth.
