

Submitter: Erika Wendell
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB3214

The use of animals in circus acts is barbaric and outdated. The mass majority of people know this is morally and inherently wrong and cruel as these animals are sentient. Taking the step to ban use of animal circuses will be a step forward in human history as being more compassionate and benevolent. It is all to aware that animals are needlessly caged and tortured in these environments. This is unacceptable for a species who claims to be the most intelligent.
