

Submitter: Sally Stevens

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB871

I lived in NW Ptd apts in 1976 when I first moved to Ortlinc after graduating with MSW from Case Western Reserve U in Cleveland, OH. It was love at first sight! Everyone looked healthy and the city was so clean! No graffiti and rare trash! Now it looks so much sadder and unhealthy! One factor that needs immediate action is living conditions with so many people living homeless, living in dilapidated homes, or facing costs of maintaining a home that meets earthquake safety and basic weatherization in an age of climate change. Please build support if building resilience whenever possible! This is a high priority need for quality of life here.
