## **Yes on House Bill 2922**

### **Support for Increasing the Amount of Bonding Required Bonding for Construction Contractor Licenses**

The Sheet Metal and Air Conditioning Contractors Association of Oregon and Southwest Washington (SMACNA) **supports House Bill 2922** and urges the support of the House Committee on Business and Labor.

Our trade association represents large and small contractors in the HVAC, metals fabrication and architectural metals industry and our members firmly believe in the need for contractor licensing and bonding as a consumer protection and will always support it.

We welcome Representative Nelson's legislation to update the bonding levels required for each type of construction license and believe that the bill has an appropriate increase that will be of benefit to the public if they encounter problems with a contractor – while at the same time not setting a level that will overburden new emerging contractors just starting out.

**SMACNA Urges Passage of HB 2922 !**
