

Submitter: David Bernal

On Behalf Of:

Committee: Senate Committee On Housing and Development

Measure: SB847

I support this bill because point access blocks will make it cheaper to build eco-friendly and affordable family friendly housing. It also enables a broader range of apartments to be built that are more enjoyable for the surrounding community and residents. These style of buildings are common the world over and in older parts of US cities and we should welcome them back into Oregon.
