

Submitter: Ashley Corey

On Behalf Of:

Committee: Joint Committee On Semiconductors

Measure: SB4

In relation to the -3 and all other amendments that damage our land use system in this bill -- for this reason I am submitting testimony in opposition. Please focus development of new tech jobs in industrial lands saved just for this purpose -- they are more appropriate than large sections of rural land outside the UGB. Protect the farmlands and rural reserves of Oregon that have been purposefully preserved by extensive planning. Also, no one person in power should have authority to move land into the UGB, these decisions are complex and involve many many stakeholders.
