

Submitter: Nina French

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB871

My partner and I lost our house due to me being a Washington State Department of Health Whistleblower. I have been unable to use my degree or education. I'm 51 and found out I am also Autistic, which is an additional barrier to obtain employment. My fear is that my partner and I will never be able to own a home again. It tears me up and I wish you would allow me to use Death With Dignity. No one should EVER go through what we have been through. No one ought to be able to turn me into a millstone to the person I love.
