

Submitter: Daphna Andrews
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB3213

Animal testing is cruel, inhumane and completely unnecessary to manufacture safe beauty products for humans. Pouring makeup components into rabbits' eyes causing severe burns and blindness or feeding them to a dog to see if they are poisonous is so beyond any conceivable reason other than severe sociopathy on the part of the tester. There are already 42 countries that have banned animal testing and make safe cosmetics and beauty products where no humans have ever suffered a fate like the aforementioned animals.

Oregon is associated with nature and beautiful wildlife. Let's continue to be a beacon of light for humanity and treat all animals with kindness and compassion. Please support HB 3212 that 'Prohibits manufacturer from selling or offering to sell cosmetic developed through use of cosmetic animal test.'

"The greatness of a nation and its moral progress can be judged by the way its animals are treated." ~ Gandhi
