

I oppose HB 3214. It is clear that Representatives Hudson, Chaichi, and Gomberg are activists that have no clue as to how the real world works in animal husbandry. These people are not environmentalists as they continually do more harm than good while in these positions of power. The mismanaged forests that unnecessarily burn these creatures alive is a horrible death. The predators that are being introduced or protected do not kill with mercy. They slowly eat them alive which is also an inhumane death. Making it a criminal offense to transport animals that some bureaucrat makes up is just one example of asinine ideology from radical groups intent on destroying, taking, and causing harm to humans and animals. This is not a representative form of government when bills such as this are introduced. This is a clear attack as these so-called representatives are the very predators that cause the damage they pretend to advocate for. If you support this bill then recognize that you are the problem not the solution. We are the true environmentalists that care deeply for those animals WE OWN.

This is the cause of radical groups and representatives that pass bills that cause mis-managed forests. This is inhumane. This is a baby deer that asphyxiated because of the forest fire smoke IN BAKER COUNTY.

This is the remains of a poor creature that couldn't escape the Armageddon of fire that swept through killing everything in its wake IN BAKER COUNTY.

Here are pictures of more animals that died of a horrible death due to bad bills such as this IN BAKER COUNTY.

This is the result of bad bills that protect predators that kill slowly which should make every person that loves animals angry at those with the power of the pen that caused this IN BAKER COUNTY.

This was a beloved fur baby from a loving family in Baker County, that was murdered in its own yard recently by wolves that this legislative body is responsible for.

AND YOU WANT TO MAKE IT A CLASS B MISDEMEANOR OFFENSE FOR LOVING ANIMAL OWNERS TO USE ANIMALS FOR:

- (a) "Education program" means an animal exhibition designed to impart information about an animal's natural behavior, habitat or life cycle for educational or conservation purposes.
- (b) "Performance" means a carnival, circus, display, exhibition, exposition, fair, parade, petting zoo, photographic opportunity, race, ride, trade show or similar undertaking during which an animal performs tricks, gives rides or otherwise entertains or amuses an audience, whether or not a fee is charged.
- (c) "Traveling animal act" means a performance of an animal to which the animal is transported to perform.

Once again, if you do not see the danger in this bill then you are the problem, not the solution. If you consider this bill, you are breaking the law as it is clear in the Fifth and Fourteenth Amendment. Stop this bill now AND ANY OTHER BILLS OF SIMILAR NATURE THAT YOU ARE RESPONSIBLE FOR. This bill is offensive and deserves no respect.
