

I SUPPORT [SB 839]...Biochar is the future of vegetative management to suppress wildfires and more!

<https://olis.oregonlegislature.gov/liz/2023R1/Downloads/MeasureDocument/SB839/Introduced>

DB Smith-The King of Port Orford has a great idea and it will work!

The funding for this project is a tad bit anemic. The funding should be [\$10,000,000.00].

All jurisdictions in Oregon who have vegetative waste issues should consider Biochar as an integral component in an industrial composting operation.

Agricultural and Forest burning should consider using air curtains to reduce pollution and to create Biochar.

Biochar is a superb soil amendment, a great organic fertilizer and uses for sequestering carbon.
