

Submitter: Linda Kelley

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB871

My name is Linda Kelley and I reside in Eugene. I am writing in support of SB 871. State owned buildings must be modernized to become as energy efficient as possible. This bill works in tandem with SB 868, 869, and 870 to ensure that state owned buildings are in alignment with our state's climate goals. Assessing cost effectiveness of projects to include energy savings over the life of a building will support 3rd party financing of these projects and align the work with our efficiency and emission goals. Now is the time to pass this entire bill package as there is a small window of time to take advantage of the billions in federal funding available for this work. Please pass SB 871 and the entire Resilient Building package of bills. Thank you for the opportunity to submit testimony.
