

Submitter: Jerry Cumiford  
On Behalf Of:  
Committee: House Committee On Judiciary  
Measure: HB2007

I have to pass a far more extensive background check to get my CHL, I am trained as a police officer in the military with 24 years of experience and two combat tours in two combat zones, I know how to handle a firearm and familiar with the laws. This bill will prevent me from protecting myself, my family and anyone around me by prohibiting me carrying a weapon in these designated areas. We aren't the people committing these crimes. The people you are wanting to stop don't care if you pass any laws and seem to appreciate when you post a "gun free zone" sign, it seems to act like a magnet to them. Yet, you continue to insist on hindering those of us that have not broken any laws in attempts to stop shootings. The people that are committing these crimes don't care about your laws and love your gun free zones, haven't you noticed? One would think you would have caught on to that by now, that your mentality is actually getting people hurt. Have you noticed that every time you pass an antigun law, gun crime and gun sales go up. People don't like feeling unprotected, and criminals love unprotected victims. Have you ever stopped to think why the cities with the toughest commonsense gun laws also have the highest violent gun crime rate, yet you continue to push commonsense gun laws when it's obvious there is nothing common sense about them.

To think this bill will stop a shooting is rainbows and unicorn thinking, it defies common sense, logic and holds accountable people that have committed no crimes!

This bill will not fix what you think it will, it will have the opposite effect, it will cause more people to become victims because they are totally unprotected "in a gun free zone"!
