

Submitter: Patty Falkenstein

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB869

It's time we build with intention. Green buildings should be the norm not hastily erected cracker boxes that just benefit the developer. We need to require new construction to be climate friendly and energy efficient. The apartment complex on canyon road in beaverton is a new heat island with no solar, no trees and a concrete disaster. We need better.
