

Submitter: Kara Bhullar

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2665

I believe that this should not be passed because we already do not have enough nurses working in Oregon, and capping the wages of people willing to fill a high demand is just going to urge healthcare professionals to leave the state. The cost of living continues to rise, while wages are not able to compete.

I do not agree with this bill.
