

Submitter: Michael Taylor
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB2005

My sincere desire is to have state lawmakers enforce the laws we have on the books. I am for less government in mandating how I live my life. We decriminalize the use of illicit drugs like heroin, we fail to enforce no public camping making our cities a cess-pool of filth and a heaven for lawlessness. We must do a better job of providing mental health support. I truly believe if we spent more time and the limited \$ we have on addressing rules, laws in place we could actually move the needle. But, we waste time focused on attacking the 2nd Amendment, we focus on driving law abiding Oregonians to leave our state. Please STOP - focus on getting the job done, by making Oregon more attractive and less liberal.
