

Chairman Nosse, Vice-Chairs Goodwin and Nelson, and Members of the Committee.

I wish to express strong support for House Bill 2002.

Please continue to have Oregon and some other west coast states allow unlimited access to reproductive health care and protect providers and individuals from malpractice and licensing repercussions.

I am a retired 76 year old educator (33 years of teaching) and a member of AAUW. I have a grown daughter and a 15 year old granddaughter. I certainly do NOT want my granddaughter to live in a state where reproductive health care, including birth control and abortions are restricted or even against the law. This is the 21st Century, not the 17th Century!

I trust you and your fellow Committee Members will follow common sense and allow reproductive health care without ridiculous restrictions! Please, follow your good common sense and not your political Party's unreasonable policies!

Keep Oregon a state where our Legislators follow common sense!

Thank you for taking the time to read this letter.

Barbara Ternus, Hillsboro Oregon
