

Submitter: Melissa Thompson  
On Behalf Of: Titan Timber  
Committee: House Committee On Judiciary  
Measure: HB3214

On behalf of myself and my company, I strongly OPPOSE HB3214. This bill will only serve to further separate people from the reality of where their resources come from. It also will deny children of their right to learn and grow in the agriculture industry. If this country wants to continue to eat and survive, staying connected with those resources and continuing the education of how to care for those resources is crucial. Allowing the general population to view and interact with animals is also crucial. Bad for Oregon, bad for the future, just a bad bad bill.
