

Submitter: Mike Slagle

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

Please please do not let this bill 2002 take away parents in the gender dysphoria realm. Science tells us all who we are at birth, if an adult chooses to be whoever they choose, that is their right. To encourage a child to change their identity is disgusting and dangerous to that child's future as an adult.

Adults other than the child's PARENTS should have no business helping that child transition into a dangerous process that many regret when they become adults. This bill is harmful to society and will further divide families and communities if it passes.

Government schools should be educating a child's mind not based on sexual preference or race. Diversity Equity and Inclusion is not a healthy ideology for all children to learn skills that will benefit society when they become adults. Stop this nonsense and vote No on 2002!
