

Submitter: Michael Mauro

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB2005

I stand in vehement opposition to this bill. The building, manufacture and repair of firearms and their accessories and accoutrements by private citizens is and always has been an accepted and inherent right and practice predating even the Constitution that prohibits any legislation of this type or any other.

This is, again, a blatant overreach of legislative authority and in violation of Supreme Court ruling.

Step back and get in your lane.
