

Submitter: Ian Grall
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB2005

Good day,

There are around 400,000,000 guns in the USA. According to the ATF, 20,000 are known to have been used in crimes in 2022. So 0.005% of all guns, were not serialized guns used in crime. It is a tiny fraction of trivial if view logically and non emotionally as public policy should be viewed and established.

The only substantial impact this will have is on law abiding gun owners, as usual with gun control in genera.

Further, per the more recent Bruen decision by the supreme court, there are no pre 1860 laws around home made firearms to support constitutionality of this bill. Meaning, it will eventually be struck down.

Oregon legislators purposely passing legislation that will clearly be struck down, is a waste of taxpayer money and a intentional betrayal of the public trust.

Additionally, using your public office to pass unconstitutional legislation to serve a specifically political agenda is clearly unethical.

Ian Grall,

Portland, Oregon
