

Submitter: Westly Richardson

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB2007

State laws about where an individual can carry a concealed firearm should be consistent across the state. I do not believe it should be up to the individual directors/managers/agencies to decide whether they want to allow permitted citizens to be allowed to carry a firearm into a public space. I feel this puts an undue burden on concealed carry permit holders as they would be responsible for knowing each and every area they would not be allowed to carry. I understand not wanting weapons of any kind in court and such but it needed to be consistent across the state.
