

Submitter: Larry Purdy

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

I urge you to oppose HB2002, which expands abortion coverage and forces those of us who hold Christian values to provide financial support through our tax dollars, to those who support and commit murder. "Gender affirming treatment" is not medically necessary treatment, but rather a way to force the political agendas in support of a tiny minority of confused people who do not need to become addicted to drugs and treatments that will alter their physical and emotional well-being. Please oppose HB2002 and protect vulnerable members of our communities by standing up for traditional family values.

Thank you for voting no on HB2002 and supporting the will of Oregon's majority.
