Chair Nosse, Vice-Chairs Goodwin and Nelson, and Members of the Committee

I wish to express strong support for House Bill 2002. I believe that this bill will help to protect Oregonians' rights to reproductive health care and to received treatment that is prescribed by their doctors in accordance with accepted standards of care. I think it is also important that it protects health care providers from malpractice and licensing repercussions for providing treatment.

Thank you for fighting for all Oregonians by supporting this bill.
