

Submitter: Douglas Wilmot

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB3090

Opposed. Nicotine is already protected by ID requirements and are non self service. Vape and nic salt are harm reduction options. One, never in the history of anything, has probation worked, ever. This measure is an attempt to restrict youth from engaging in harmful activities. What it ignores is the obvious harm reduction for consenting adults.

I understand the parental point, but this is harm reduction for adults, restricting access to these products for the desire of parents, take the tax, focus on education.
