

Submitter: Karry Mchugh

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

I oppose any gender affirming procedures to adolescents under the age of 25. Adolescents have no ability to make rational decisions about irreversible procedures which carry significant adverse effect to their medical and mental health.

Please stop gender affirming to adolescents. They are being brainwashed to think that their mental health issues can be solved by hormone and surgery transition. They cannot. Please look at unbiased evidence based results, not by self serving individuals and groups. Look at European counties who have reversed gender affirming care to young people.

Thank you!
