On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

Because of HB2002 I wanted to do some research on gender transitioning medical care.

I called Planned Parenthood here in Salem and stated that I was 18 and had gender dysphoria, they told me to come down to their clinic and pick up my prescription for testosterone. PP didn't ask nor was I required to see any therapist or any sort of doctor before picking up and starting the prescription.

I wanted to see how far I could transition before someone would really help me so I made an appointment with a therapist here in Salem about getting approval for top surgery. I walked in on one appointment for half an hour and then she emailed my insurance for approval at the end of the appointment.

I'm shocked by these results. You should be shocked by these results however since Planned Parenthood lined your campaign with thousands of dollars it makes complete sense why you are supporting this.
