

Submitter: Ronna Duff

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

In regards to HB 2002 I oppose this bill. It is my opinion that the government has too much say in a person's medical decisions. The government has little by little pushed their way into our everyday lives. You need to listen to the people being you work for us. This is not a bill to better one life but to cause more turmoil. Please think real hard before voting on this. Think about if you are John Q Public would you want the government making decisions on your behalf or would you want to make those decisions.
