

Submitter: Sue May

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

I am vehemently opposed to this bill. Children, including teens, have not had enough life experience to be able to make an informed & rational decision about their gender & making permanent changes to their bodies. MANY transgendered people have regretted their decision & many of them have committed suicide because of this. We need to support & inform these individuals through their pre-adult years (i.e. age 21) & not rush to make changes. I urge a no vote on this bill!
