

Submitter: Carol Fenton

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

No one should be forced to carry a pregnancy against their will and face the life-altering consequences of being denied essential health care.

While Oregon has broad legal protections of abortion and gender-affirming care, we have more work to do to ensure safe, equitable, and continuing protections and access across our state. Our rights are under attack and we must fight back — together.
