

Submitter: Michael Quillen

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

I absolutely, 1000% oppose the proposed legislation of HB2002.

It's hard to believe that our representatives in this great state have allowed themselves to be taken over by such evil, believing that a man can become a woman and visa versa, that it should all be forced to accept it, and that we indoctrinate our children with this message causing epidemic gender dysphoria in a whole generation. Woe unto those who in authority that allow this to happen!

That parents should have zero say in all "medical" procedures that could be performed on their children is absolutely unconscionable.

That our representatives would lower the bar for getting abortions while increasing the bars to hold those that do these procedures accountable to the public or object in any way is un-American, upside down, and twisted.

This is not what the people of Oregon want or have asked for. This is a mad, ideological, sick, dystopian agenda. May God have mercy on your souls if this passes.
