Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

Hello,

As a parent of young children I strongly oppose HB 2002. We must protect and be advocates for our youth. While I have immense compassion for children wanting to transition, there are many ways for them to do so without medical intervention. We just have a more cautious approach to medically altering individuals, especially when in some cases, it's permanent. It is a medical professionals responsibility to first, do no harm.
