

Submitter: Ashley hollingshead

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

Hello,

I just wanted to take a moment to voice my support of HB 2002. Healthcare is a human right and I applaud this bill for working to ensure patient access to reproductive and gender affirming care. The medical world can be difficult to navigate, so anything that removes barriers to accessing care is a step in the right direction. These are services that people want and need. These services can be more than life affirming, they can be life saving.

Thank you
