Measure: HB2002

House committee Behavioral Healthcare

Measure HB2002

I oppose this bill because it puts minors at risk physically, psychologically and emotionally. These minors are not mentally equipped yet to make these life changing decisions which the long term effects are unknown. Only the parents should be guiding and making decisions for their children and this bill interferes with that. It also forces insurance companies to pay for dangerous procedures without the payee's knowledge or consent which should be illegal. This is a scheme to benefit medical companies, pharmaceutical companies and the government.
