

Submitter: A A

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

Remember that we created a lot of laws to protect minors, to protect them from themselves, from others that would harm them and we as a society made the parents responsible for these minors. Keep parents responsible for minors under their care by not subverting the parents rights with laws that give more credence to choices made by minors who do not yet have fully developed brains capable of making life long and life altering choices.
