

Submitter: Lisa Caulley

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

I am writing in opposition of HB2002. The human brain is not fully developed until the mid to late 20s! Allowing children, teens and young adults to make such life altering decisions is reckless! There's a reason we make young people wait to vote, drink alcohol and join the military. Minors are the responsibility of their parents/guardians and this bill encourages division among families! This bill is a rushed attempt to satisfy a very complicated issue with long term effects for everybody involved! Please vote NO on HB2002!
