Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

I strongly oppose this bill. Children are still developing and learning about themselves. How can we let children make such life altering decisions as this when we can not trust themselves to take care of themselves? Their brains are not fully developed until 25, but you want to allow them to alter the course of their lives while still needed parental permission to do most everything else. It is rather disgusting that this is even ul for debate.
