On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

It is absolutely imperative to preserve the freedom and dignity of all Oregonians to ensure healthcare is accessible and safe for all people, regardless of gender identity or sexual orientation.

People deserve to control their own bodies and decide when, where, and with whom they start and family. They deserve to be their authentic selves.

Every study shows that gender affirming care is good for people's health and overall wellbeing and saves lives.

Every study shows that reproductive healthcare is necessary to save lives and not force people to undergo pregnancies that they did not consent to.

Quite simply denying healthcare to anyone is beneath humanity.
