

Submitter: William Burt

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

I suppose it's too late to submit this testimony, but why is parental permission required for school field trips, general surgical procedures, etc.—but NOT for major procedures such as child sterilization and abortion (according to HB 2002)? This is sheer madness. Planned Parenthood reaps more profits, while young people are saddled with lifelong negative repercussions. Oregon must be the most anti-child state in the nation!
