

Submitter: Denis White

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Senate Bill 85-1

I support a greatly enhanced bill to prohibit large factory farms in Oregon. With the knowledge of how migration from the southwest and other areas of the US is going to affect Oregon, I think it is vital to have a sound policy on the kind of farming we want to have for the future. We know in the Willamette Valley that small farms are great contributors to a healthy Oregon. We want to see that continue and be expanded across the state.
