

Submitter: Concerned Parent

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

Hello,

I am writing in opposition to HB 2002 because I think it will cause many unintended consequences that will harm minors. This bill facilitates minors without a fully developed brain to make long-term decisions that will affect their lifelong health and potentially affect their ability to have children. It also shields medical providers from full responsibility for their actions, which is unthinkable. Please do not pass HB 2002 as it will harm youth and drive up costs of medical care for Oregonians.

Thank you,
Concerned Parent
